

## **Action Gator Tire Stores: Mike Grise**

**“ When we got SmartWeight on our Hunter GSP9700 balancer I was told it would save on wheel weights. So when I started to see that we were using about a third less weight I was pleased but not surprised. Wheel weights just keep going up in price so a 33% savings is a very good thing. What I didn’t realize was how much better the balance would be. We had one customer who had a chronic vibration problem that we had tried several times to fix. We just didn’t seem to be able to satisfy this guy. After balancing his tires with SmartWeight the problem was fixed and the customer went away happy. We have had no comebacks for balance issues since we started using SmartWeight.”**
