Dear Kevin,

In August of 2005 we purchased The Hunter GSP9700 Road Force Measurement System to deliver the best in quality tire balancing to our customers at Horizon Tire and Automotive. Our Tire Installers have found the GSP9700 easy to use thereby creating savings on labor costs. In addition during November 2005 we purchased the Smart Weight System creating even greater reduced labor costs to us and reduced wheel weight consumption.

The GSP9700 and Smart Weight System combined has been a great way to service our customers with accurate wheel balancing. The Tire Installers have confidence balancing tires knowing the system produces accuracy.

We would recommend The Hunter GSP9700 Road Force Measurement System and Smart Weight System to any shop needing to meet accurate wheel balancing to deliver quality service to their customers while reducing labor cost at the same time.

Fred Ullmann
